**AK-10**

## WHITE AS ORIGIN

After Bleu Azur des Sommets and Vert Émeraude des Cimes, AKHOR explores a new expression of time : white. **Not as a color, but as a source...**

In watchmaking, light reveals construction. It highlights volumes, sharpens angles, and brings finishing details to life. Here white emphasizes structure, **clarifies legibility and affirms balance.** It expresses an architectural language, stripped of unnecessary ornamentation, where modernity emerges from precision.

## A PATENTED ARCHITECTURE

The AKHOR dial is built upon a patented dual-disc system, in which **the upper disc is suspended.** This principle is not a visual effect. It is a genuine **structural innovation.**

The suspension creates a controlled space between the two plates, generating depth and lightness while respecting the mechanical constraints of stability and precision.

In its white interpretation, there is no distraction, no excess. Only a perfectly balanced architecture — as if white acted as a technical revealer, elevating the dial into a three-dimensional structure rather than a simple decorative surface.

### DIALOGUE BETWEEN DIAL AND CALIBRE

The AK-10 calibre, designed exclusively and COSC-certified, occupies the case space with carefully controlled proportions: 31.30 mm in diameter within a 39 mm case. This precise relationship ensures a balanced casing, free from excessive constraint or structural emptiness.

The discipline of the dual-disc dial echoes the rigor of the movement's internal architecture: 117 components arranged according to a logic of stability and performance. AKHOR's avant-garde is not limited to aesthetics. It is mechanical.

### LIGHT IN ROTATION

**The sunburst finish amplifies the dynamic perception of the dial.** Rays unfold from the centre, capturing and diffusing light according to the movement of the wrist. The surface is constantly evolving. Light glides across the rhodium-plated hands, reveals the edges of the cushion case, and accentuates the transitions between polished and satin finishes. Light is no longer a simple reflection. It becomes a structuring element.

### STRUCTURE & PRECISION

**In the honeycomb version, white adopts a more technical reading.** The geometric motif organizes the surface into regular micro-structures. The repetition of the pattern reinforces the architectural coherence. Here, light is channeled, fragmented, and mastered. **LUMIÈRE BLANCHE, where white reveals space and light gives shape to time.**  
AKHOR — the balance between space and time.

## AK-10-AU

### LUMIÈRE BLANCHE

4N/5N GOLD case and buckle

**Display :** hours / minutes (gold-plated hands with luminous tips)  
**Seconds :** gold-plated hand with AKHOR logo counterweight  
**Dial :** dual-disc system with patented suspended upper disc  
**Pattern :** white sunburst  
**Case :** cushion case in 4N / 5N gold  
**Diameter :** 39 mm — thickness: 11 mm  
**Crystal :** sapphire crystal with internal anti-reflective coating  
**Caseback :** transparent sapphire  
**Water resistance :** 30 metres  
**Strap :** hand-stitched white alligator — 20 mm x 18 mm  
**Clasp :** folding clasp in 4N / 5N gold

**Calibre AK10**, developed exclusively for AKHOR, manufactured by CLAMAX

**Manual winding mechanical movement**

**COSC certified and Poinçon de Genève** 

**Frequency :** 28,800 vibrations/hour (4 Hz)

**Power reserve :** 60 hours

**Dimensions :** 31.30 mm diameter — 3.90 mm thickness

117 components — 12 jewels

**Function :** stop-seconds

Variable inertia balance with regulating weights

**Hand decorations :** anglage, fan-shaped Côtes de Genève, wheel finishing

Exclusive cushion-shaped screws

## AK-10-AU-D

### LUMIÈRE BLANCHE

GEM-SET 4N/5N GOLD case and buckle

**Display :** hours / minutes (rhodium-plated hands with luminous tips)  
**Seconds :** rhodium-plated hand with AKHOR logo counterweight  
**Dial :** dual-disc system with patented suspended upper disc  
**Pattern :** white honeycomb  
**Case :** cushion case in 4N / 5N gold  
**Diameter :** 39 mm — thickness: 11 mm  
**Bezel :** set with 120 diamonds (0.3 ct)  
**Crystal :** sapphire crystal with internal anti-reflective coating  
**Caseback :** transparent sapphire  
**Water resistance :** 30 metres  
**Strap :** hand-stitched white alligator — 20 mm x 18 mm  
**Clasp :** steel folding clasp set with 76 diamonds (0.34 ct)

**Calibre AK10**, developed exclusively for AKHOR, manufactured by CLAMAX

**Manual winding mechanical movement**

**COSC certified and Poinçon de Genève** 

**Frequency :** 28,800 vibrations/hour (4 Hz)

**Power reserve :** 60 hours

**Dimensions :** 31.30 mm diameter — 3.90 mm thickness

117 components — 12 jewels

**Function :** stop-seconds

Variable inertia balance with regulating weights

**Hand decorations :** anglage, fan-shaped Côtes de Genève, wheel finishing

Exclusive cushion-shaped screws
